App inventor  
chicken-o-saurus challenge

# CHICKEN-O-SAURUS!

Behold *dino-chicken*. Paleontologist Jack Horner observes that since birds are the descendants of long-extinct dinosaurs, why couldn't we *turn a chicken back into a dinosaur*?

Create an app with a single large button with a picture of a chicken-o-saurus ( use google to get image or look [here](#) ) that when pressed roars like a dinasour ( use google to get sound file or [try this](#),[that](#), or [over there](#) )
